CLEMENT® creating light...beautifully™

Case Study: Private Residence, London

Project Synopsis: New Clement metal windows and doors for 'Arts and Crafts' home

Clement was thrilled to be asked to manufacture the new steel windows and doors for this spectacular Arts and Crafts style house in the Hampstead Garden Suburb.

The new leaded Brooking windows and W20 steel doors, look just like the originals – perhaps even better!

Hampstead handles were chosen for the windows and Kensington handles for the doors. They were all polyester powder painted in RAL 9005 Jet Black to match the frames.

Our client is really pleased with the end result and said:

"We placed a large order with Clement of double glazed leaded doors and windows. From start to finish we received a first-class service and the product quality and finish is superb."

Site: Private Residence, Hampstead Garden Suburb, London

Colour: RAL 9005 (Jet Black) matt

Furniture: 158SF Hampstead handles for the windows and FA3005 Kensington handles for the doors

Clement bespoke Brooking steel windows and W20 doors are manufactured from hot rolled steel window and door profiles generally in compliance with BS 6510 Revision 10 Nov 2020 which are produced from 98% recycled steel source material. Hot dip zinc galvanised to EN ISO BS:1461 and with a polyester powder coat paint finish to BS:6497 2005 EN 13438 2018.
