FORENSIC EXPERTS

Specialist forensic investigation and root cause analysis for the insurance, legal and risk management professions. With offices in the UK, Dubai, Hong Kong and Singapore.

www.hawkins.biz

Acoustics & Audiology | Civil & Structural Engineering | Contamination | Digital Forensics
Electrical Engineering | Escapes of Water, Gas & Fluids | Fire & Explosion | Fraud | Hydrology
Materials Failure | Personal injury | Power & Energy | Process Engineering | Railways
Road Traffic Collisions | Shipping & Marine | Vehicle, Plant & Machinery
Hawkins, established in 1980, provides specialist forensic root cause analysis and expert witness services to the insurance, loss adjusting, risk management and legal professions.

The company has 8 offices in the United Kingdom and offices in Dubai, Hong Kong and Singapore. All offices are staffed by highly experienced forensic scientists and engineers from a wide range of disciplines.

The Dubai, Hong Kong and Singapore offices are supported by the international team who travel from the United Kingdom at short notice to secure evidence and conduct investigations.

We provide a rapid response, attending a scene immediately if required. A preliminary report is produced within three days of the scene visit, setting out the most probable cause and a proposed strategy for further investigation. Our reporting is flexible and can be tailored to your needs, depending on the scale and urgency of the investigation.

When needed, a full investigation can be carried out in order to formulate a clear and impartial report for the support of legal action.

“Clients come back to Hawkins because of our honesty and integrity; very sound technical knowledge and expertise married with a real commercial awareness of what our clients need – rapid response, quick accurate advice, communication of the evidence and the investigation in a way they can act upon.”
**HAWKINS’ EXPERTISE**

**AUDIOLOGY & ACOUSTICS**
Our experts are able to assess and advise on acoustic design in the planning stages, and provide mitigation strategies post-construction in the event of a noise dispute.

**CIVIL & STRUCTURAL**
We can provide expert investigation of defects and failures in the built environment, including structural movement, collapses, water ingress, storm damage and personal injury.

**CONTAMINATION**
Our team of highly qualified and experienced chemists can investigate a wide range of chemical contamination and spillage incidents.

**DIGITAL FORENSICS**
Hawkins experts collect, forensically authenticate and preserve original evidence. We discover the source of a digital event or attack, how it occurred, and what information may have been lost or compromised.

**ELECTRICAL**
We investigate incidents including failures and injury involving most types of electrical equipment, from micro-electronics and domestic electrical appliances through to high voltage generation and distribution.

**ESCAPE OF WATER, GAS, OIL AND OTHER FLUIDS**
We can provide system failure analyses for incidents involving all fluids and gases in industrial and domestic settings with on-site and laboratory investigations.

**EXPLOSIONS**
What was the cause of the explosion? Our expertise has been sought on many significant cases around the globe.

**FIRE**
As a leader in fire investigation, Hawkins has the knowledge and experience necessary to investigate the full scale of losses globally, and to advise on recovery, liability and risk management issues.

**FRAUD**
Comparison of physical evidence with witness accounts enables our investigators to establish if the evidence is commensurate with a suggested sequence of events or actions. This applies to both small losses involving personal property and major loss.

**HYDROLOGY**
Our expert hydrologists and engineers have years of experience identifying the cause(s) of complex flooding incidents.

**MARINE INCIDENTS**
We can assist on a wide range of incidents including agricultural cargoes, liquefaction, fires, explosions and chemical contamination.

**MATERIALS**
From medical implants to satellites, our experts are on hand to establish the cause of failure of manufactured items.

**MECHANICAL**
Losses often involve the failure of multi-component mechanical systems. We have the breadth of knowledge and experience to identify the cause, no matter how complex.

**PERSONAL INJURY**
With the Courts taking ever harder views on personal injuries, it has never been more important to take independent and expert advice. We can assist with all types of personal injury, including the specialised and complex areas of slips, trips and falls and noise induced hearing loss.

**POWER & ENERGY**
Our experts are skilled in investigating all aspects of this field including electric shock, gas leaks, power failure, over-voltage, equipment failure and poor design and maintenance.

**RAILWAYS**
We have investigated incidents including derailments, unintended runaways and accidents at level crossings.

**ROAD TRAFFIC COLLISIONS**
Our investigators identify all contributory factors and can deal with issues such as vehicle speed, visibility and human factors, CCTV analysis, road positioning, weather, vehicular faults and damage assessment.

**VEHICLE AND PLANT**
We are skilled in the investigation of fires and failures involving all types of vehicles and plant. We routinely review designs and maintenance practices to provide recommendations to our clients.
