March 2021
Criminal Law and Practice of Medicine in the UK- CAPSCO May 2021
Premex plus leading by example conference March 2022
Legal update for expert witnesses 2023- Bond Solon

Summary of Experience:

I qualified in 1983 and trained in surgery in general from 1983 to 1989. I commenced training in Plastic, reconstructive and Hand Surgery in 1989. I have been in Consultant practice since 1998 and have been a Consultant Plastic Surgeon at Sandwell and West Birmingham NHS Trust since June 1999. My work involves the treatment of all types of hand surgery, burns, facial and soft tissue injuries, elective hand surgery, breast surgery, scars and deformities, skin cancer and cosmetic surgery.

I am a consultant plastic and hand surgeon with experience in producing medical reports. I have been involved in medical legal work and I have provided medical reports for personal injury cases and medical negligence cases since 1997. I have in the region of 200-250 new instructions a year. These have been predominantly in the following areas of expertise:

- Hand surgery: Sequelae of hand injuries and surgery
- Soft tissue injury: Sequelae of post traumatic scarring
- Burns management: Sequelae of disability following burns injury, scarring and surgery.
- Medical negligence in Cosmetic Surgery (in the region of 50 reports a year).

80% of this work is related to personal injury cases and the remaining 20% is providing reports on liability and causation and condition and prognosis in medical negligence cases in plastic, reconstructive, hand and cosmetic surgery.

As a Plastic Surgeon I deal with hand injuries and I am involved in dealing with these injuries, rehabilitating the patients and providing them with advice as to how they can return to work. I also give advice on scars, comment on their prognosis and whether they can be improved by various forms of surgery. I treat patients with skin cancer and patients with burns. I also perform cosmetic surgery and I would be happy to provide opinions on medical negligence in cosmetic surgery, such as complications following breast reduction, reconstruction, silicone implantation, liposuction, body contouring surgery and surgery for facial rejuvenation including eyelid surgery, facelifts and rhinoplasty surgery.

I have received certification from the Intercollegiate Cosmetic Surgery Oversight Committee as a certified cosmetic surgeon being on the General Medical Council's specialist register and having demonstrated to the RCS that my training, professional skills, clinical skills and knowledge are of a satisfactory standard. <https://www.rcseng.ac.uk/patient-care/cosmetic-surgery/choosing-a-surgeon-and-hospital/certified-cosmetic-surgeons/>

Depending on availability of medical notes an appointment can be provided within 4-6 weeks of request and a medical report within 4-8 weeks of the appointment. I also have the facility of taking photographs if required at a competitive rate.

My reports are prepared in accordance with new Civil procedure rules and I would be prepared to act as a single joint expert. . The percentage of work I undertake for Claimants and Defendants and SJE is in the region of 80:10:10.

I have prepared a chapter for the Encyclopaedia of Forensic & Legal Medicine entitled "Medical Malpractice in Cosmetic and Plastic Surgery"

I have attended court as an expert witness once every two years.
