

**Elizabeth Emma England CV****Overview:**

Elizabeth is a successful Computer Forensic (CF) Analyst and Data Recovery Engineer with extensive experience working for the public and private sectors. Her expertise and experience includes:

- Performing hardware and software data recoveries from all forms of failed computer media, including forensic data recoveries and CCTV systems;
- The forensic examination of mobile phone handsets, personal digital assistants (PDAs), SIM/USIM cards and removable memory cards;
- Securing forensic images of all forms of computer media, evidence handling and the day to day running of a successful imaging laboratory.

Achievements:

Elizabeth achieved science based A-levels and joined the Device Development team within a pharmaceutical company in 1999. There she gained valuable experience in working in an analytical laboratory environment and was involved in organising and assisting with pre-clinical drug trials.

In 2002 she moved into a more computer based role, where until late 2006 she worked with leading Computer Forensic companies as a data recovery engineer and lead computer forensic analyst supporting a team of seven investigators. During this time she gained extensive knowledge in data recovery techniques, the imaging, handling and storage of computer evidence and more recently the forensic examination of mobile phones and PDAs.

In late 2006 Elizabeth co-founded Griffin Forensics Ltd and has continued to provide data recovery and mobile phone analysis services to the public and private sector.
