Surgical Fellowship (June – December 2011)

I undertook my surgical fellowship in the South Wales Region, operating within hospitals in both the public and private setting. My fellowship was in the field of knee arthroplasty and soft tissue surgery. My Consultant tutors were Mr Stuart Roy, and Mr Angus Robertson. This fellowship was conducted alongside my post as a locum consultant at the Royal Gwent Hospital Newport.

During my fellowship I had exposure to many aspects of knee arthroplasty surgery, including selective single compartment arthroplasty, arthroplasty combined with ligament reconstruction, and revision arthroplasty. Both supervising consultants had a sub- speciality interest in sports knee injuries, particularly in high level athletes. I learnt many new techniques in ligament reconstruction, meniscal repair/ transplantation as well as several cartilage regeneration procedures.

Orthopaedic Experience

I have completed 6 years of training on the All Wales Training Scheme, and I am now a substantive consultant. I have a broad experience in both elective and trauma orthopaedics. I personally see approximately two thousand trauma patients in the outpatient setting annually, with a wide variety of orthopaedic injuries. My specialist area of interest is in lower limb surgery, especially that of the knee. I am a high volume surgeon, carrying out approximately 150 knee replacement operation a year.

Medicolegal Experience

I have attended a “Medico-Legal Expert Witness” course organized by Specialist Info in Birmingham in April 2013.

I have been providing expert medicolegal reports for over two years.

I am fully registered with MedCo as a Direct Medical Expert (DME4684)

Teaching Experience

I am regularly involved in teaching and medical education. I have previously attended a teaching the teachers course.

I am the assigned educational supervisor for core surgical trainees within my department.

I am regularly involved in the core teaching programme for General Practice trainees.

I am a teaching faculty member at the WIMAT centre in Cardiff. I teach and demonstrate annually on their ACL cadaveric course.
