2006 – Present, Synergy Orthotic Clinical Services (synergy-ocs.co.uk)

Consultant Orthotist and Expert Witness

I've established a private service providing complimentary orthotic treatment to paediatric patients with acquired brain injury up to adulthood and also adult orthopaedic patient working alongside other members of the rehabilitation team.

In 2013 I started undertaking expert instructions in civil cases covering medical negligence and personal injury. I undertake approximately 40 cases per annum and the current split is Claimant 65%, Defendant 25%, SJE 10%.

I have written the Biomechanics teaching course for the Scottish Qualification Authority that was launched for the 2017/8 academic year.

2005 – Present, Blatchford Clinical Services (Blatchford.co.uk)

Senior Orthoist, Area Manager, Clinical Specialist and now National Clinical Lead.

I am currently the National Clinical Lead for the largest Prosthetic and Orthotic Service provider to the NHS. Clinically I have extended scope experience in the treatment of musculoskeletal and brain injuries. I am experienced in the use of gait analysis and lead on the development of technology in the clinical service. In addition to my clinical work, I provide nationwide leadership to all our rehabilitation services, balancing the needs of the customer and business to deliver outstanding care to our patients. I direct the chairs of the Clinical Governance Groups and lead on the Quality Governance process. I have either being the primary or secondary author for national evidence based treatment pathways, education biomechanical modules and education supplements for Allied Health Professionals.

For six months in 2017 I was seconded to Norway to help establish improvements in a struggling service.

2003 – 2005, Cappagh National Orthopaedic Hospital Dublin

Lead Orthotist In charge of developing the orthotic staff and service provision in Dublin at the National Orthopaedic Centre as well as satellite clinics throughout rural Ireland. Extensive experience gained in complex orthopaedic cases.

1999 – 2003, Halo Healthcare, London

Orthotist Working for the NHS via a private contractor in a variety of settings from general clinics to specialist services.
