

PAUL CAIN

PRINCIPAL CONSULTANT

Paul conducts and trains individuals and organisations in specialist cyber forensic investigations

With 15 years' experience, including 6 within law enforcement, he has conducted investigations, produced and given evidence in high profile cases. His insight and skills of explaining complex concepts in layman's terms have encouraged clients to go further resulting in positive outcomes. His tenacious approach to problem solving and attention to detail has led him to identify new forensic artefacts. Paul produces high quality technical training material and presents from a practitioner perspective receiving consistently very high levels of positive feedback.

- Forensic Foundation, Internet and Network at Cranfield University
- BSc Surveying and Mapping

MAKING THE DIFFERENCE

UK Law Enforcement: Reducing a backlog.

Paul not only managed the 7Safe project conducting outsourced investigations within a tight timescale and limited budget but he shared his knowledge and experience to allow them to improve their internal working practices.

Law Firm: Expert Report

Paul conducted an expert technical review of forensic report produced by another party and was able to technically question their methods and findings resulting in the court discrediting their evidence and a high value financial settlement.

Utility Company: 6 figure compensation from a sub-contractor.

The company were faced with a technical challenge following information in respect to an alleged fraud. Paul devised a process, developed algorithms and using specialist techniques, processing a large data set, was able to identify fraudulent activity.

PREVIOUS EXPERIENCE

Hertfordshire Constabulary – Digital Forensic Investigator.

Actively involved in the development of the infrastructure and processes of the unit. Conducted over 500 investigations, provided specialist technical advice in respect to digital investigations to senior officers and management.

Hertfordshire Constabulary – Criminal Intelligence Analyst

Devising process to cross link intelligence and crime data for pro-active resourcing and identifying leads in major investigations.

Hertfordshire Constabulary – Application support

Providing 24/7 support for critical IT software systems, testing, including Y2K, implementing a new intelligence system and conducting a data migration between firearms licencing systems.

Paul is currently one of only fourteen Certified Cyber Forensic Professionals in the UK. (April 2017)

"I thought Paul was an excellent teacher. I highly commend his teaching style and his knowledge within digital forensics certainly seems to be boundless."
