

Tom Taylor

Tom is a chartered quantity surveyor, quantum expert and managing director at Base Quantum. He has over fifteen years' experience in construction across a wide range of fields including energy, pipelines, civil engineering, and major infrastructure projects, such as airports, highways and marine structures.

He has worked throughout the supply chain on projects of all sizes in the UK and Europe, and on major construction projects whilst based in Africa and the Middle East. His varied career has provided him with hands-on experience of claims and commercial issues under various forms of contract.

More recently, Tom has been instructed as an expert witness in over 70 contentious matters of varying size and value. He has been appointed by public and private clients, contractors, and subcontractors in litigation, international arbitration and other alternative dispute resolution fora, in courts including the TCC in the UK, and abroad. He has testified and been cross examined, both virtually and in person, as a party-appointed and single joint quantum expert. Tom's recent experience of international arbitration proceedings relates to major projects in Africa, Europe, the Middle East and Australia.

Coming originally from a subcontractor background, Tom recognises that his advice and opinions need to be concise, practical, and proportionate. This focus on producing clear and effective work product which tackles the key issues of a dispute is of particular value to clients.
