

SafeGuard – the one source solution to your security needs

Core SafeGuard expertise

Experience & Expertise

SafeGuard have over forty years experience in risk assessment, design, specification and management of security systems. As one of the foremost security litigation consultancies in the UK we provide a rare insight into the failures and inadequacies of design, installation standards and contractual disputes. This knowledge is used extensively to protect client interests throughout the UK and overseas.

The Balanced Approach

The most cost effective method of protecting property, assets and people is to adopt a strategic approach to security needs. Global assessment avoids the need for crisis response to individual events and provides a firm basis on which to build for the future. **SafeGuard** can help by assessing current risks and providing a formula for the longer term.

Technical Competence

The key to competence lies in the depth and range of relevant technical knowledge and capability. **SafeGuard** are exceptionally well qualified and cover key areas of security and related activities. Specialist sectors include, access control, aviation security, CCTV (VSS), conflict avoidance and restraint training, intruder alarm systems, physical, perimeter, manned guarding services and signalling and communication (remote signalling) formats.

Problem Solving

Immediate advice and support, effective assessment. Professional Mediation and Expert Witness services.

Documentation and Standards

SafeGuard's work with industry lead bodies, inspectorates, training organisations and the BSI has provided an unrivalled knowledge of industry standards, codes of practice, quality schemes and contractual agreements. This knowledge is used to control installation standards and in the preparation of relevant and necessary security related contractual terms to safeguard the client's position.

Multi Disciplinary Approach

Our team of individual experts cover a wide spectrum of security disciplines and will ensure all recommendations fully complement each other.

SafeGuard specialisations

Evaluation of Innovative Security Products

Guidance on viability, design, development, manufacture, pricing, marketing and conformity to standards.

Security Audits

Global security audits for UK sites - improved management of resources and personnel, through systems, policies and procedures. Employee training and manuals provided.

Risk and Loss Management

We handle sensitive issues relating to financial, materiel, personnel and product related issues with discretion. Immediate advice followed by in-depth investigation.
