CURRICULUM VITAE

OF

ISMAIL MALLICK

PhD, MS, DIC, FEBS (Coloproct), FASCRS, FACS, MRCS (Eng), FRCS (Gen. Surg) FRCS Ed

Name	Ismail Hameed MALLICK
Present Position	Consultant Colorectal & General Surgeon University Hospitals Dorset Bournemouth, England
	Visiting Faculty- Bournemouth University
	Member of Court of Examiners, RCS England
	Member of Executive Council, RCS England
	FRCS Examiner
	European Board of Surgery Examiner
	Programme Director- Care of Critically Ill Surgical Patient, RCS England
General Medical Council	4771201

QUALIFICATIONS

Medicolegal Course	Currently enrolled in the Cardiff University Bond Solon Course
Edward Jenner Award in Leadership Foundations	Mar 2016 NHS Leadership Academy
Basic Medical Degree	MBBS, 1997 Annamalai University, India
Post graduate Qualifications	FRCS Edinburgh 2020 Royal College of Surgeons of Edinburgh
	FACS (Fellow of American College of Surgeons) Chicago, USA 2019
	FEBS (Fellow of European Board of Surgery) Coloproctology 2016
	FRCS, General Surgery 2014 Royal College of Surgeons of England

	Colorectal Fellowship 2013 Cleveland Clinic, Cleveland, OH, USA
	PhD in Surgery 2006 University College London
	MS in Surgical Sciences 2002 Imperial College School of Medicine University of London
	Diploma of Imperial College 2002 Imperial College, London
	MRCS, June 2001 Royal College of Surgeons of England London.
IT Qualification	European Computer Driving Licence (ECDL) Certificate, Aug 2004 British Computer Society

I am an active member of the court of the Examiners of the Royal College of Surgeons of England and have examined for MRCS Part B exam in various centres such as London, Bristol, Malaysia, Egypt and India.

I am also an active Examiner for the European Board of Surgery for Coloproctology.

I have experience delivering education via face to face, e-learning, virtual classrooms and simulated learning. For example, during the Covid-19 pandemic when travel restrictions and social distancing rules were in force I delivered the MRCS part B and the European exams in digital format.

I have taught and has been faculty for the Care of Critically Ill Surgical Patient (CCrISP) over many years. In view of my extensive teaching experience with the CCrISP course; I am now one of the established course directors at the College. I am now also part of the faculty that introduced CCrISP from the RCS to the Swiss College of Surgeons.
In addition I am also faculty for the CCrISP Instructor, Basic Surgical Skills Course and START course at the College.

In 2016, I completed the Edward Jenner Award in Leadership Foundation at the NHS Leadership Academy.
At present I am the Surgical Lead for Inflammatory Bowel Disease at Royal Bournemouth Hospital and manage cohesively the multi-disciplinary team comprising of dieticians, nurses, radiologists and physicians.
I am the Surgical Lead for Clinical Audit and Effectiveness Group (CAEG) and lead the team at Bournemouth effectively by working with internal and external stakeholders.
I also intermittently chair the Colorectal cancer MDT conferences at the University Hospitals Dorset.
My latest appointed with the RCS has been as the EDI lead for the Executive Committee of the Court of Examiners in November 2024.
All of the above opportunities have enabled me to develop and strengthen my management and leadership experience and skills. It is widely recognised that to be an effective leader and manager, good communication skills are vital.

I successfully completed the National Advanced Communication skills Training (ACST) in 2015 which highlighted the importance of both verbal and non-verbal communication skills. These skills served as a framework for my professional development when communicating with health care providers and patients and their families.
I attended the Non-Technical Skills Course in June 2024 at the RCS Edinburgh. This training reiterated the importance of good communication skills in all areas of my practice. In fact I have recently been invited to write an editorial on " How are Non-Technical Skills Learned? Importance of Simulation and High Performance Teams" to the Spanish Surgical Society and the paper submitted to Cirugia Española.

My recent collaboration with Bournemouth University as a Visiting Faculty and my on going two years commitment to the RCS proves my ability to develop effective partnerships with relevant stakeholders and organisations.

I am a recognised Educational and Clinical Supervisor fulfilling the GMC trainer requirements. I understand the syllabus for the MRCS Exams very well.

I am adept at using IT to my advantage and regularly use emails, teams, word processing, spreadsheets, Excel, Powerpoint and Zoom both personally and professionally.
I did sit and pass the European Computer Driving Licence qualification a number of years ago.

I am also part of faculty training surgeons perform laparoscopic surgery in Serbia. (Lapserb)

I have also previously presented on surgical education entitled " Increasing Awareness and Surgical Education Amongst Junior Doctors Improves Patient Safety During Intimate Examinations In a Acute Surgical Admissions Unit". Poster Presentation. International Conference on Surgical Education & Training, Copenhagen, Denmark, Nov 2015.

The above clearly demonstrates that I am a creative and energetic team player with proven leadership qualities. I am passionate about my roles and I utilise time management skills incorporating appropriate delegation to ensure my commitments are satisfied.

I have applied to study Masters in Medical Education at Queens University Belfast commencing in January 2025. I have extensive experience as RCS England faculty and course director delivering courses for the Department of Learning at the RCS.

In my role as the acting STC Rep at Bournemouth Hospital I work closely with the Wessex Deanery. I participate in the trainees ARCPs at the Wessex Deanery.

I am passionately enthusiastic regarding training and education and my CV demonstrates my experience and education.

I have taught and examined medical students when I worked as an Honorary Lecturer for the Royal Free and UCL between 2002- 2005. I have been involved in setting up modules for teachings and assessing them for the final year OSCEs.

In order to improve my teaching skills I also enrolled on the Teaching Improvement Programme System (TIPS) at University College London in 2005.
In addition I also completed the RCS- Training the Trainers Course in 2014 to consolidate my teaching skills.

I have proven my dedication and commitment to the NHS, HEE and RCS England where I am a Fellow, as evidenced by my past and ongoing work.
I have evidently demonstrated my strong leadership history working within the multidisciplinary team, stakeholders and organisations thus developing strong effective partnerships.
I would embrace this opportunity to become a clinical lead supporting the development of a diverse programme of learning to help the future surgeons prepare for the MRCS Part B.
I have a strong understanding of the MRCS Part B examination since I have been an examiner for the RCS England for this exam for the past two year.

I consider this to be an exciting challenge – one which I would show the same dedication and enthusiasm to as my other achievements and commitments.

I am acutely aware of the modern diversity of individuals in surgery and am proudly currently appointed as the EDI lead for the Executive Committee of the Court of Examiners. This is an area close to my heart having been an overseas surgical trainee in England from 1997 to 2014 when I was appointed to the post of Consultant Colorectal Surgeon in my current employment.
I am a passionate role model to the trainees in my Trust.

Present Position

22 Aug 2016- Till date	**Consultant Colorectal & General Surgeon** Royal Bournemouth Hospital, Bournemouth

Posts Held

1 Apr 2016- 19 Aug 2016	**Consultant Colorectal Surgeon** Raigmore Hospital, Inverness
1 Oct 2015- 31 Mar 2016	**Locum Colorectal & General Consultant Surgeon** Royal Bournemouth Hospital, Bournemouth
1 Oct 2014 to 30 Sept 2015	**Post CCT Fellow**

Colorectal Surgery
Diana Princess of Wales Hospital, Grimsby
Supervisor: Mr JG McAdam

3 Oct 2013- 30 Sept 2014 **SpR General/ Colorectal Surgery**
York Hospitals NHS Trust, Scarborough
Supervisors: Miss McNaught / Prof Macfie/Mr Peter

14 July 2013- 3 Oct 2013 **Locum SpR General Surgery**
St George's NHS Trust, London
Supervisor: Mr G Vasilikostas/ Mr M Reddy

1 July 2012- 30 Jun 2013 **Clinical Fellow Colorectal Surgery**
Cleveland Clinic, Cleveland, Ohio
Supervisors: Dr Remzi, Dr Kiran / Prof Lavery / Prof Kessler/ Dr Hull
Program Director: Dr David Dietz

This was a hands-on one year clinical post doing advanced colorectal surgery in one of the top centres in the world.
Cleveland Clinic is a tertiary referral centre for colorectal problems. The fellowship was recognized by the American Society of Colon and Rectal Surgeons. I had the opportunity to be involved in the management of a high volume of patients with colorectal malignancy and inflammatory bowel disease. Working at a specialist centre gave me a chance to greatly increase my colorectal experience, particularly of patients with complex IBD and those requiring pouch surgery. I had the opportunity to perform both open and laparoscopic surgery, complex re-operative surgery and observe less common procedures such as Koch Pouch formation and rectourethral repair. I am conversant with the multidisciplinary approach in the management of advanced primary and recurrent colorectal cancer. I also performed regular colonoscopies. I also gained advanced training (level III) in emergency and elective surgery for inflammatory bowel disease. I also gained experience in the management of complex fistula-in-ano, sphincter repair for faecal incontinence, rectal prolapse surgery (perineal excision and rectopexy) and the assessment of patients with functional and evacuatory bowel disorders (constipation and megarectum). I took an active role in several in-house courses on the assessment of pelvic floor disorders. I also began to develop my skills in laparoscopic colorectal surgery. I participated surgical on call on a 1in 8 rota. I rounded on the colorectal patients every day and attended outpatient clinics twice a week. This opportunity gave me an insight into complex decision making and team working and also the opportunity to work in a different health care system. It also gave me the chance to witness a different surgical training program and see how the surgeons in US are training surgeons over a shorter timeframe than in the UK.

26 Oct 2011- 30 Jun 2012 **Research Fellow- Colorectal Surgery**
Cleveland Clinic, Cleveland, Ohio
Supervisor: Dr Kiran

This was a full time research post at the Cleveland Clinic and served as an introduction to the US System. I was in charge of the Colorectal Cancer Database and the Pouch Database. I obtained the skills necessary to do clinical research on humans including obtaining institutional review board approval. I also learnt about research ethics and research governance. I had written two papers and one is already published in the DCR and the other being resubmitted to Journal of GastroIntestinal Diseases after corrections. I was actively involved in the teaching activities of the colorectal department including research meeting, tumor board meetings, x-ray conference and journal club. I regularly gave presentations during the research meetings including updates. I had presented the study on pouch vaginal fistulas at the American Society of Colorectal Surgery as a podium presentation.

7 Feb 2005- 2 Oct 2011

Specialist Registrar – Leeds Teaching Hospitals
General Surgery
Yorkshire Deanery
Programme Director: Mr J R Ausobsky

1 Feb 2002 to 23 Jan 2005

Research Fellow
University Dept of Surgery
Royal Free & University College Medical School
Hampstead, London
Supervisors: Prof Winslet / Prof Seifalian

I was attached to the Royal Free Hospital, Hampstead, London during this period. My clinical work included working as a junior registrar providing hospital at night cover on a 1:2 basis in general surgery. I was involved in managing the medical problems in surgical patients, managing emergency and trauma patients and attending theatres at night. I had several Papers and presentations during this time when I was doing PhD at the UCL. In recognition of my teaching abilities I was appointed as an Honorary Lecturer in Surgery. I have been involved in coordinating the teaching and assessing the medical students at the end of their placement in surgery. I have used the following methods: formal lectures, discourses and bed side clinical teaching, I was also involved in examining candidates for Objective Structured Clinical Examination (OSCE) in the third year MBBS examinations at the Royal Free & University College Medical School. I have also been involved in teaching laboratory skills for Bachelor of Science (BSc) and Master of Research (MRes) students while pursuing PhD. I produced a thesis on the Role of Intestinal Microcirculation During Ischaemia- Reperfusion Injury.

1 Oct 2001 to 31 Jan 2002

Research Fellow
General surgery
Hammersmith Hospital, London
Supervisors: Prof N El-Lalani/Prof P Abel

I was involved as a full time research student at the Imperial College and was attached to the Hammersmith Hospital. I completed Masters in Surgical Sciences awarded by the Imperial

College. I was regularly involved in the research meetings and the department's educational activities.

7 Feb 2001 to 30 Sep 2001	**Senior House Officer** General Surgery Diana Princess of Wales Hospital, Grimsby Supervisors: Mr Pearson / Mr Westwood
2 Aug 2000 to 7 Feb 2001	**Senior House Officer** ENT Surgery Monklands Hospital, Airdrie Supervisors: Mr Picozzi / Mr Johnstone
2 Feb 2000 to 1 Aug 2000	**Senior House Officer** General Surgery Diana Princess of Wales Hospital, Grimsby Supervisor: Mr Samy
4 Aug 1999 to 1 Feb 2000	**Senior House Officer** Accident and Emergency Diana Princess of Wales Hospital, Grimsby Supervisor: Mr Shweikh
3 Feb 1999 to 3 Aug 1999	**Senior House Officer** Orthopaedics and Trauma Diana Princess of Wales Hospital, Grimsby Supervisor: Mr Bagga
4 Feb 1998 to 2 Feb 1999	**Senior House Officer** Accident and Emergency Joyce Green Hospital, Dartford Supervisor: Dr Thurston / Mr Kerur
1 Nov 1997 to 31 Jan 1998	**Senior House Officer** General Surgery Madras Medical College, Madras Supervisor: Prof Vittal
1 July 1997 to 10 Oct 1997	**Clinical Attachment** General Surgery Kings College Hospital, London Supervisor: Prof M Rela
10 Feb 1996 to 9 May 1997	**Senior House Officer** Accident and Emergency

Madras Medical College, Madras
Supervisor: Prof T C Mahendran

10 Feb 1995 to 9 Feb 1996 **Pre-Registration House Officer**
Sri Ramachandra Medical College Hospital, Madras
Supervisors: Prof Ashok, T R Gopalan

Overseas Elective

7 Jan to 26 Jan 2007 **Visiting Observer**
Colorectal Surgery
Cleveland Clinic Florida
Supervisor: Prof S Wexner
